FORECAST PV & LOAD · **OPTIMIZE** STORAGE DISPATCH · **UNDERSTAND** SYSTEM SIGNALS · **ASSIST** WITH SYNCBOT AI

KSTAR SYNC CLOUD · FORECAST TO DISPATCH

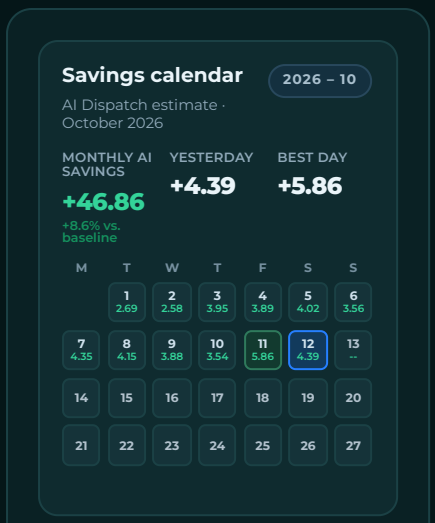

A full-day plan. Refined as the real day unfolds.

AI Dispatch reads how energy is generated and used, then helps storage respond as the day changes. It brings solar, storage and household demand into a smarter energy plan that adapts to changing conditions.

96
QUARTER-HOUR POINTS

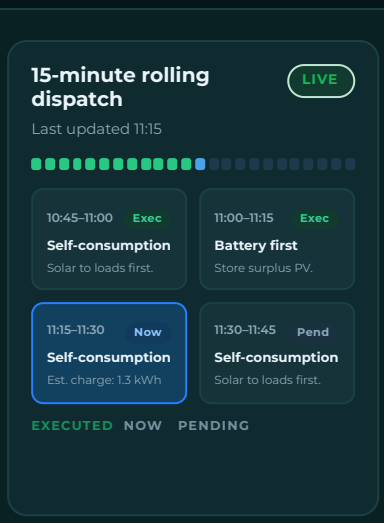

15 min
ROLLING CYCLE

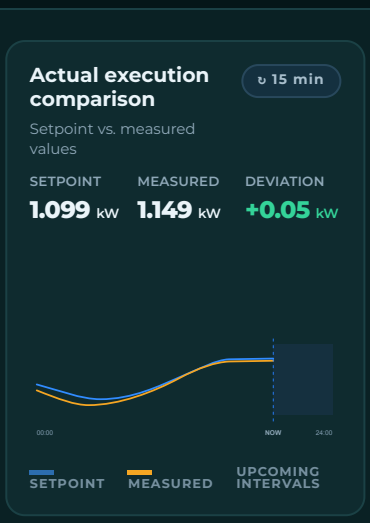

See savings, day by day.

Review daily and monthly estimates at a glance. Actual results vary by site conditions.

See the next move take shape.

Executed, current and upcoming intervals reveal how the strategy unfolds through the day.

Compare plan with performance.

Visualize setpoint, measured value and deviation at each 15-minute interval.

SYNCBOT AI · YOUR ENERGY AI ASSISTANT

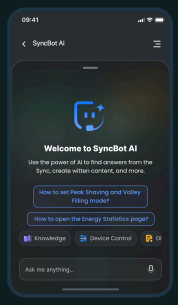

A smarter conversation with energy.

SyncBot AI brings product context and energy insight into one intelligent assistant. Ask by voice or text, explore system questions in natural language, and move from data or alerts to clear, useful guidance.

01 / CONVERSE

Your question sets the direction.

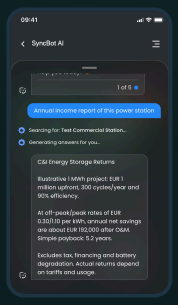

Ask naturally about product, installation, operation and maintenance. SyncBot AI uses product and model context to shape a relevant response—by voice or text.

02 / GENERATE

Clear answers. More energy insight.

Turn complex energy questions into clear, structured insights that make the important details easier to act on.

03 / INTERPRET

See the tariff. Understand your energy.

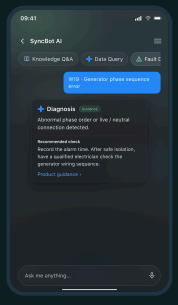

Explore dynamic electricity tariffs and query key system energy figures through a natural conversation.

04 / GUIDE

Turn alarms into clearer next steps.

Submit multiple alarms together. See their meaning, possible causes, checks and handling guidance, with source references when available.

Make the next decision with more of the picture.

Explore AI Dispatch and SyncBot AI on KSTAR Sync.
